

GL CHEMTEC INTERNATIONAL LTD.

Organic Synthetic Chemists

Job Type: Full Time

Location: Oakville, ON, CANADA

Job Category: Science

Industry: Pharmaceutical/Biotech

Number of Positions: 2

Company URL: <http://www.glchemtec.ca>

Email your resume: info@glchemtec.ca

GL CHEMTEC INTERNATIONAL LTD. is a progressive contract research organization dedicated to the custom synthesis of fine chemicals and intermediates to the pharmaceutical and biotechnology sectors. We are currently seeking enthusiastic individuals to join our team in the capacity of **Organic Synthetic Chemists**.

Position Description # 1

As an Organic Synthetic Chemist you will provide your knowledge of organic and organometallic chemistry in order to contribute to the synthesis of new compounds destined for a variety of drug discovery projects.

Primary Responsibilities:

- Research and development of new synthetic pathways to target compounds
- Independently plan and execute the synthesis of literature and non-literature compounds within a specified time-frame
- Monitor the progress of reactions using known analytical techniques
- Work-up and develop purification techniques for target compounds
- Accurately record data and contribute to the write-up of final technical reports and other required documents
- Develop new skills and knowledge in the laboratory with respect to current projects underway in-house.

Position Requirements:

- M.Sc. or B.Sc. degree in chemistry from a recognized University with industrial chemistry experience
- Experience and understanding of standard safety procedures for the laboratory
- Experience with analytical methods (GC-MS, HPLC, NMR)
- Good communication skills, both written and oral
- Able to interact efficiently and respectfully with group members
- Proven ability to work independently with strong problem solving and decision-making skills
- Ability to prioritize and manage multiple chemistry projects at one time
- Ability to work overtime as required by specific projects
- Positive mental attitude is a must!

Position Description # 2

This is a permanent position. As a Senior Organic Synthetic Chemist you will provide your knowledge of organic and organometallic chemistry in order to contribute to the synthesis of new compounds destined for a variety of drug discovery projects.

Primary Responsibilities:

- Research and development of new synthetic pathways to target compounds
- Independently plan and execute the synthesis of literature and non-literature compounds within a specified time-frame
- Monitor the progress of reactions using known analytical techniques
- Work-up and develop purification techniques for target compounds
- Accurately record data and write-up final technical reports and other required documents
- Contribute to the growth and training of junior team members
- Contribute to discussions with external clients on an as needed basis
- Investigate new ideas for novel drug discovery and drug design projects

Position Requirements:

- Ph.D. degree in chemistry from a recognized University with a minimum of 10-12 years industrial synthetic chemistry experience
- Experience and understanding of standard safety procedures for the laboratory
- Experience with analytical methods (GC-MS, HPLC, NMR, LCMS)
- Good communication skills, both written and oral

- Able to interact efficiently and respectfully with group members
- Proven ability to work independently with strong problem-solving and decision-making skills
- Ability to prioritize and manage multiple chemistry projects at one time
- Ability to work overtime as required by specific projects
- Positive mental attitude is a must!

No phone calls accepted.
