

GL CHEMTEC INTERNATIONAL LTD.
Organic Synthetic Chemist

Job Type: Full Time

Location: Oakville, ON, CANADA

Job Category: Science, Chemistry

Industry: Pharmaceutical/Biotech

Number of Positions: 2

Company URL: <http://www.glchemtec.ca>

Post Date: Immediate

Email your resume: info@glchemtec.ca

GL CHEMTEC INTERNATIONAL LTD. is a well-established, Canadian contract research organization, dedicated to the design of new materials and to the custom synthesis of novel compounds that are destined for its clients' unique and progressive research programs. We are currently seeking enthusiastic individuals to join our team in the capacity of **Organic Synthetic Chemists** as we continue to expand our capabilities and service offerings.

Position Description:

As an Organic Synthetic Chemist you will provide your knowledge of organic and organometallic chemistry in order to contribute to the synthesis of new compounds destined for a variety of drug discovery and new material design projects.

Primary Responsibilities:

- Independently plan and execute the synthesis of literature and non-literature compounds within a specified time-frame
- Monitor the progress of reactions using TLC, GCMS, HPLC, and LC-MS
- Work-up and develop purification techniques for target compounds using automated column chromatography, recrystallizations, etc.
- Accurately record data and contribute to the write-up of final technical reports and other required documents
- Contribute to the growth and training of junior team members

- Contribute to discussions with external clients on an “as needed” basis
- Investigate new ideas for novel drug discovery and drug design projects

Position Requirements:

- PhD or M.Sc. degree in Chemistry from a recognized University – industry experience is preferred
- Experience and understanding of standard safety procedures for the laboratory
- Good communication skills, both written and oral
- Able to interact efficiently and respectfully with group members
- Proven ability to work independently with strong problem solving and decision-making skills
- Ability to prioritize and manage multiple chemistry projects at one time
- Positive mental attitude is a must!
